

# STUDENT-MASTER PROJECT

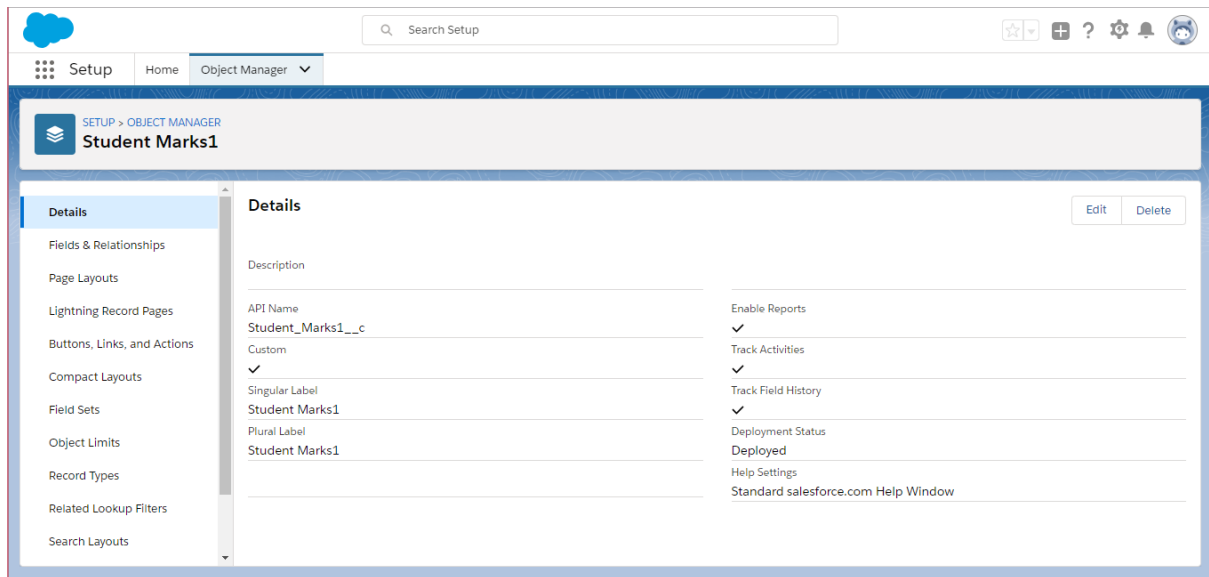

This project aims to provide proper understanding of the Salesforce app-builder functionalities. Following are the functionalities achieved through this project.

1. Welcome Email created and sent to every new student joining the institute.
2. Fields are updated.
3. Student details are posted to chatter.
4. Marks creation
5. Sent degree for approval to a different user to approve or reject the degree proposal.

## OBJECTS

Here two objects namely Student Masters New and Student Marks1 is created.

## **FIELDS AND RELATIONSHIPS**

Here various custom fields are added to the created objects and relationships have been established.

## Field Dependencies

Here the City field depends on the Country field and each value of country field has separate values of city field.

## PAGE LAYOUT

Through page layout we can view and modify how the student master and student marks page look .

## VALIDATION RULES

These are constraints which can be created in order to get more accurate data and maintain data quality.

Here, four validation rules were applied:

1. Age cannot be changed in edit mode – Age once entered and saved cannot be changed later.
2. Age Check – Age should not be less than 19 years.
3. Check Country Change – In edit mode country cannot be changed from India to USA.
4. Name Length Check – Length of name should not be more than 10 characters.

The screenshot shows the Salesforce Setup interface. The left sidebar contains a navigation menu with options like Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Validation Rules' and shows a list of 4 items, sorted by Rule Name. The rules are:

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Age_cannot_be_changed_in_edit_mode	Top of Page	Cannot edit age in edit mode	✓	Sneha ., 2/12/2019, 5:24 PM

## WORKFLOW RULES

## All Workflow Rules

[Help for this Page](#) ?

Configure your organization's workflow by creating workflow rules. Each workflow rule consists of:

- Criteria that cause the workflow rule to run.
- Immediate actions that execute when a record matches the criteria. For example, Salesforce can automatically send an email that notifies the account team when a new high-value opportunity is created.
- Time-dependent actions that queue when a record matches the criteria, and execute according to time triggers. For example, Salesforce can automatically send an email reminder to the account team if a high-value opportunity is still open ten days before the close date.

### Quick Tips

- [Useful Sample Workflow Rules](#)
- [Video Tutorial \(English Only\)](#)
- [Troubleshooting Workflow](#)

## PROCESS BUILDER

Through process builder we define what happens after a record is created.

1. A welcome email is send.
2. Comments and Confirmed fields gets updated.
3. Student details are posted to chatter.

4. Marks are created.

5. The new record is then sent for degree verification to the new user created previously.
